1. INTRODUCTION

KnB's meetup is a meetup site developed for people who are interested in Tech events like Product launches, Conferences, Meetups happening in the United States. The users can login, view events and register for them if they are interested. Also, if a user wants to add or host a new event, they can create a new event by giving all the event details.

2. FEATURES

- Explore thousands of Tech events across United States and register for them.
- Users can maintain dashboard which shows real-time data for an event.
- Create a new event just by filling a form providing Event details.
- Setting up the basic details for your event on KnB's is quick and simple. Customize the name and location, and write a short description to get your attendees excited.

3. GETTING STARTED

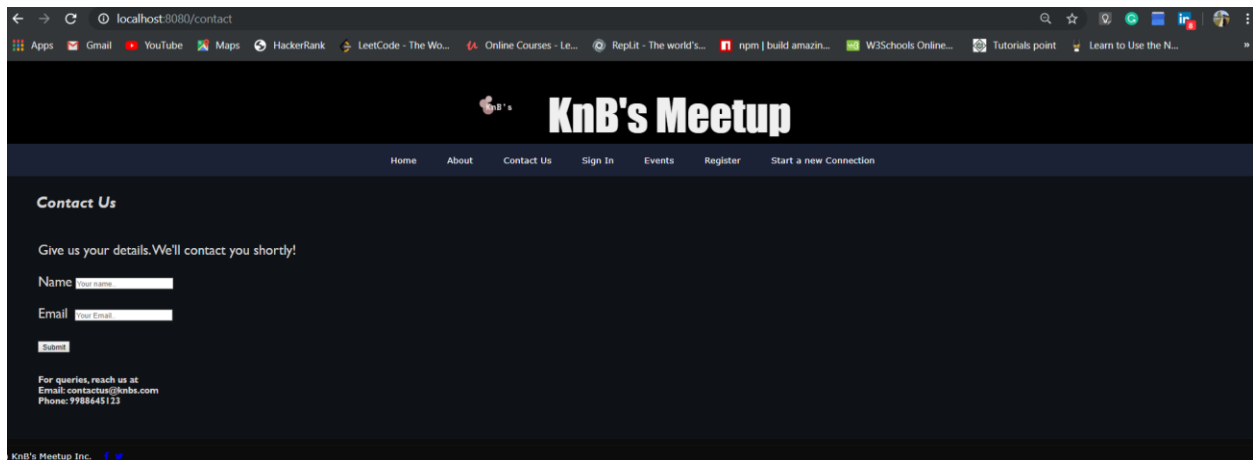

- First page is the 'Index' page where the user enters the web application and the user is now displayed with the main information about the website along with links to About, Contact, Login and events page.

- Clicking the 'About' will lead to the About page which contains information about the KnB's Company and their functionalities.

- 'Contact' page is where a user can submit their queries by submitting their contact details.

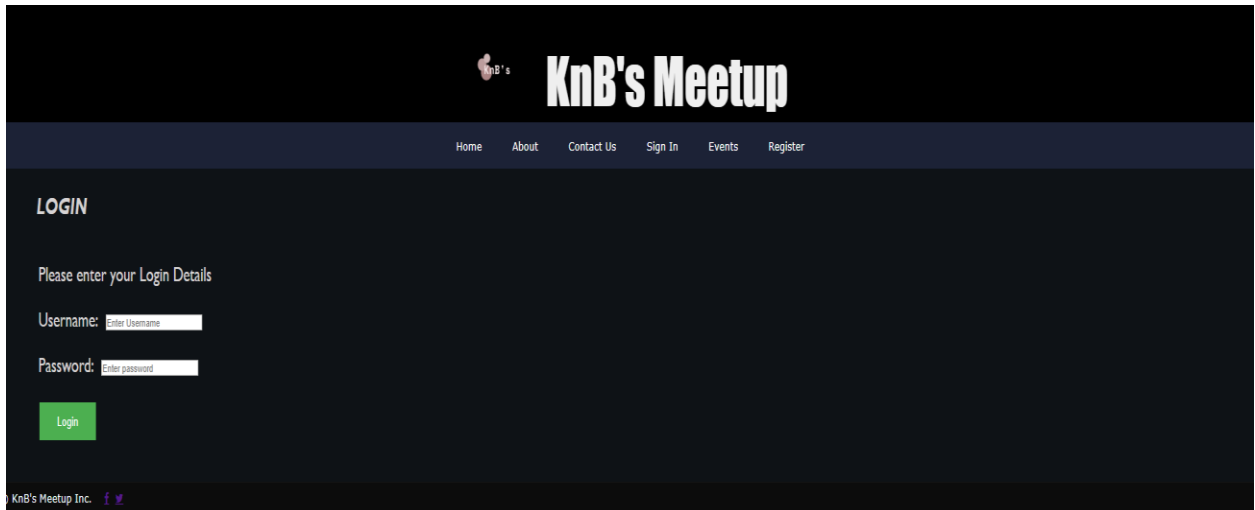

- A user can view the list of Events by clicking the Events tab.

USER LOGIN/ SIGNUP:

- Initially, a user must have an account to register for an event or host an event. If the user is already a member, he has to login before updating his event profile.

The image shows the login page of the KnB's Meetup website. The header features the KnB's Meetup logo and a navigation menu with links: Home, About, Contact Us, Sign In, Events, and Register. The main content area is titled "LOGIN" and prompts the user to "Please enter your Login Details". It includes input fields for "Username" and "Password", each with a placeholder text "Enter Username" and "Enter password" respectively. A green "Login" button is positioned below the password field. The footer contains the text "KnB's Meetup Inc." followed by social media icons for Facebook and Twitter.

EVENT REGISTRATION

- If a user wants to register for an event, he must have an account. Otherwise, the user needs to create an account to RSVP an event. Users who have logged in can view their saved events by going to 'My Events' tab. Also, the user can edit or delete the event that they have created.

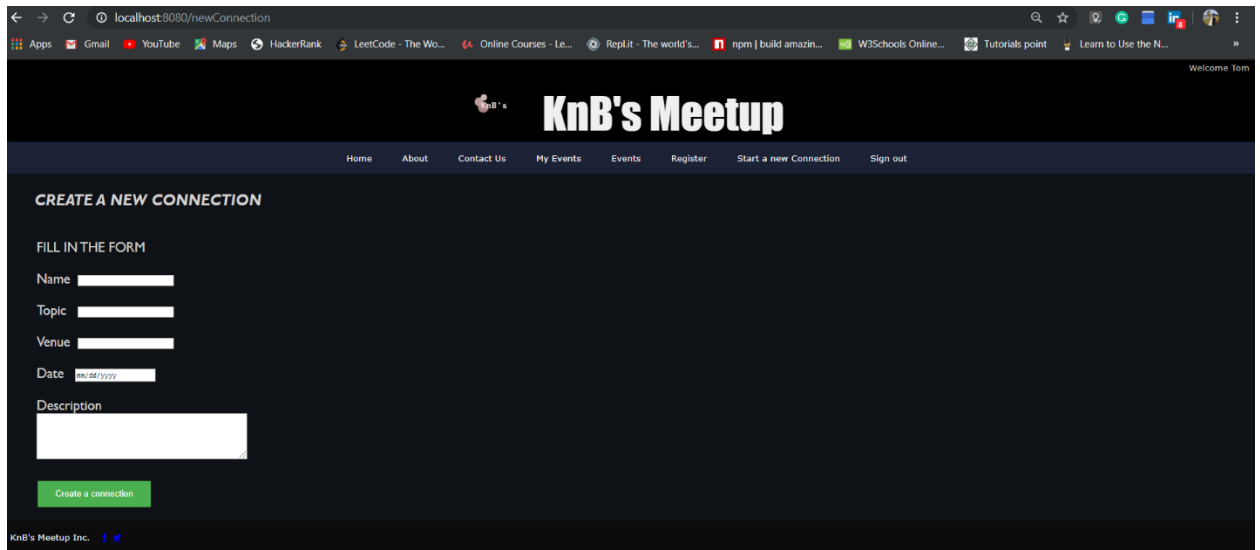

- When a user wants to make RSVP for an event, he needs to go to Events tab where he can find all the list of Events taking place. By clicking an event, it leads to that particular Event page containing the details about the events along with the options to respond for RSVP (Yes, No and Maybe).

- Once a user has registered for an event, he can update his RSVP status by going to his Event list, clicking on that particular event then update the RSVP.

CREATING A NEW EVENT

- When a user wants to host an event, he can go to ‘Create New Connection’ tab and provide all the details about the event. Once the form is submitted, the new event gets added to the Events list and the event is now available for the public for registration.

The screenshot shows a web browser window with the URL `localhost:8080/newConnection`. The browser's address bar and tabs are visible at the top. The website has a dark theme. The header features the 'KnB's Meetup' logo and a navigation menu with links: Home, About, Contact Us, My Events, Events, Register, Start a new Connection, and Sign out. A 'Welcome Tom' message is in the top right corner. The main content area is titled 'CREATE A NEW CONNECTION' and contains a form labeled 'FILL IN THE FORM'. The form fields are: Name (text input), Topic (text input), Venue (text input), Date (date picker showing 'mm/dd/yyyy'), and Description (text area). A green 'Create a connection' button is at the bottom of the form. The footer shows 'KnB's Meetup Inc.' with social media icons for Facebook and Twitter.
